Electronic Health Record (EHR): Find the Perfect Fit

Do you have all the right pieces and the right people to assemble your solution?

Sometimes healthcare institutions can overlook an important piece necessary to putting together the right EHR solution: **clinical pharmacists**.

These clinicians play a critical role in optimizing therapeutic outcomes. Their clinical knowledge and expertise can prove valuable in configuring a system that helps users reduce medication errors, enhances coordination of care and medication use processes, and keeps the focus on the well-being of patients.

Wolters Kluwer's Clinical Effectiveness solutions help healthcare professionals measurably improve the quality and effectiveness of care. We provide evidence-based clinical content and advanced decision support technology wherever healthcare professionals are working so they can make the best possible decisions for their patients. Solutions include Lexicomp® drug references, Medi-Span® drug data, and UpToDate® clinical decision support, all of which integrate into EMRs and clinical workflows to provide proactive, efficient access to valuable decision support at the point of care.
