

Dental ePrescribing

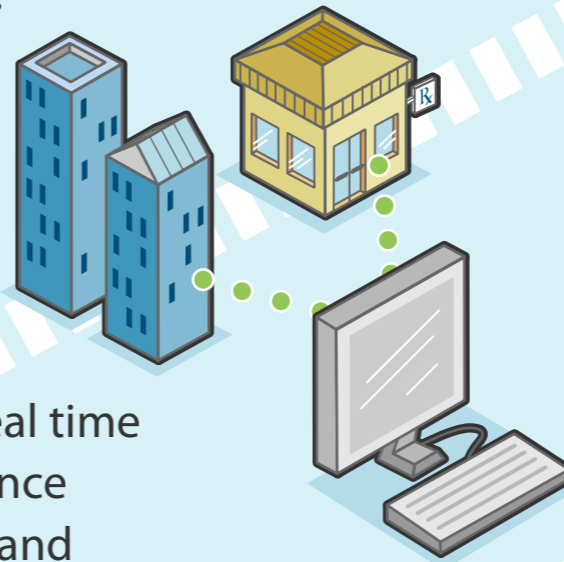

Electronic Prescribing (ePrescribing) is a safe & efficient alternative to paper RXs and pharmacy phone calls.

STREAMLINING THE PROCESS

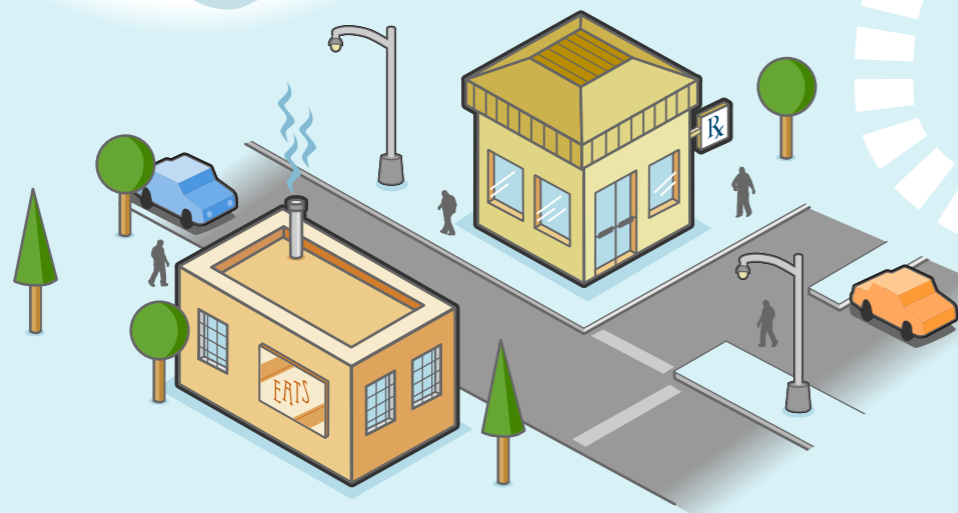

1 Add patient to DoseSpot

2 View patient's medication history in real time from insurance companies and pharmacies

5 Select patient's preferred pharmacy and send the ePrescription

3 Create an ePrescription by selecting medication, dosage and directions with dental-specific data on hand

4 Automatically run drug-to-drug and drug-to-allergy interactions

6 Patient picks up prescription at pharmacy
